Westward Trains are Superior to Trains of the Same Class in Opposite Direction.

FROM SAN FRANCISCO—Mina Sub Division—TOWARD SAN FRANCISCO

Eastward — **Nevada & California Branch** — **Westward**

San Francisco Sept. 20, 1921.

COPY:

Mr.C.S.Fee,
Mr.H.P.Thrall,
Mr.T.O.Edwards:-

It has been decided to continue for the present the daily operation of passenger trains 23 and 24 and 27 and 28 on the Mina and Westwood branches instead of reducing the service to tri-weekly as has been in contemplation.

In view of that decision please understand that trains 183 and 184, 193, 197 and 198 shown on Salt Lake Division Time table No. 22 as mixed trains will be operated as straight freight trains and will not carry passengers.

G F RICHARDSON

CLEARANCES.

1. Rule 83-A will not apply at initial stations not a telegraph office or at initial stations where the office is closed for the day or night.

2. Trains must obtain clearance card (Form 2643) before leaving Hazen and Susanville, or Lucin on Promontory Branch.

REGISTERING.

3. Sparks Sub-Division trains Nos. 27, 28, 183 and 184 will register at Fernley.

4. At registering stations on single track or at the end of double track when passing from single to double track where trains are permitted to register as per Rule 83-B, conductors and telegraphers or telephone operators must comply with Rule 96, the same as at non-registering stations.

5. Westward trains will leave registering ticket, Form 2642, with operator at Lucin, who will register for them. Westward trains (except extras) will leave registering ticket, Form 2642, with operator at Rose Creek, who will register for them. Extra trains will not register at Rose Creek. Eastward trains will leave registering ticket, Form 2642, with operator Oreana, who will register for them. Eastward trains will not register at Lucin or Rose Creek except when run over westward track, and westward trains will not register at Oreana except when run over eastward track; but this does not relieve them from checking register at Rose Creek and Lucin when required by the rules. Trains required to register will stop and register when above offices are closed. No. 1, No. 2, No. 9, No. 19 and No. 20, will leave registering ticket (Form 2642) with operator Wells, who will register for them.

TRAIN AND AIR INSPECTION.

6. Running inspection must be made of all passenger equipment when pulling out of sidings, when passing to double track, Oreana and Lakeside, and to single track, Rose Creek, Engle and Weber Jct.

7. Eastward freight trains will approach under control and will stop at Ditho, Clark, Thisbe or Gilpin, Hawes or Apache and Tioga, and westward freight and mixed trains at Cluro, Beowawe or Ladoga, Bunnel, Litchfield and Elburz or Halleck for trainmen to examine their trains. Also at Fernley on freight and mixed trains originating at Hazen. All Eastward freights stop at either Lucin or Pigeon for inspection. Should train have reason to stop at Lucin, inspection may be made at that point. Otherwise it will be made at Pigeon. After a continuous run of thirty (30) miles, freight trains must be stopped and inspection made of running gear, wheels, etc., as per Rule 820.

Except where water stations are more than thirty miles and less than thirty-five miles apart, and when stop may be eliminated by running between water stations, this will be permissible. Distance of thirty-five miles in no instance to be exceeded.

Eastward trains stop at Queen and Hammil and westward trains stop at Basalt, Bellville and Tonopah Jct. 5 minutes for wheels to cool.

7-A. Engines running light on descending grades of over one and one-half (1½) per cent will make the same stops for inspection as are made by freight trains on such grades. These stops need not be of the same length as required of freight trains, but should be sufficiently long for enginemen to satisfy themselves that tires and machinery are all right. This practice will guard against slipping of tires on heavy grades.

8. In addition to tests at initial stations, air brakes on all trains must be tested from rear of trains after brake pipe has been separated from any cause, and must be tested from rear of train before leaving Mt. Montgomery and Westwood Junction and on all eastward freight trains at Valley Pass, and on westward freight trains at Moor.

9. On grade between Mound House and Dayton eighty (80) M's per operative brake will be the maximum load allowable on train. On grade between Tonopah Junction and Mt. Montgomery and between Queen and Mt. Montgomery maximum load will be forty (40) M's per operative brake. On grade between Moor and Wells, Valley Pass and Montello, Westwood Junction and Westwood and Westwood Junction and Susanville, maximum load allowable will be one hundred and fifty (150) M's per operative brake.

10. Freight and mixed trains must use retainers, Moor to Wells, and Valley Pass to Montello, Promontory to Blue Creek, Promontory to Lake, from (M-P 708) to Terrace, from (M-P 708) to Matlin, Wheaton Spur to two miles east of Susanville, Mt. Montgomery to Hammil, Mt. Montgomery to Tonopah Junction, Candelaria to Filben, Moundhouse to Dayton, Gartney Hill 45 cars or more. Retainers must be changed frequently by trainmen descending these grades to allow wheels to cool.

USE OF ''19'' FORM TRAIN ORDER FOR RESTRICTING TRAINS WITHIN AUTOMATIC BLOCK SIGNAL LIMITS.

Within automatic block signal limits, between Sparks and Ogden, the note under Rule 211 is modified as follows:

Form ''19'' train order may be issued to restrict the superiority of a train, except that Form ''31'' must be used:

When orders are delivered at a non-telegraph or closed telegraph station. (See Rule 217.)
When necessary to restrict a train which has been cleared or the engine of which has passed train order signal. (See Rule 219.)
When issuing an order Form ''G,'' Example 3.
When giving any train right over all trains.
When reducing a time order where necessary that dispatcher have signature of superior trains before completing order to an inferior train.

Operator will fill out clearance, designating thereon numbers of orders, repeat to dispatcher train and order numbers as they appear on clearance and obtain O. K. with time and superintendent's initials, writing same before delivery in blank space following ''Signal is out for.'' Operator will retain carbon copy of clearance.

Dispatcher must write train and order numbers in his train order book as transmitted by operator from clearance, and must designate time clearance was made O. K., not transmitting O. K. unless operator repeats numbers of all orders to be delivered to the train to which clearance is addressed.

When a ''19'' order restricting superiority is issued at a station where superiority is restricted, train must be stopped by operator before delivery of order.

Conductor's and engineer's attention is called to the importance of approaching at a moderate rate of speed, telegraph offices where orders are to be received. Also to the necessity of carefully checking clearance to ascertain positively that clearance is properly addressed and that orders received are those called for by clearance.

Rule 251 is amended to read as follows: In transmitting train orders by telephone, the names of stations must be plainly pronounced, and then spelled letter by letter, thus: ''Aurora, A-u-r-o-r-a''; all numerals must first be pronounced and then followed by spelling, thus: ''1-0-5, O-n-e N-a-u-g-h-t F-i-v-e.'' The train dispatcher must write the order as he transmits it and underscore it as it is being repeated. The letters duplicating names of stations and numerals will not be written in the order book nor upon train orders.

AUTOMATIC SIGNALS.

11. Rule 504 is amended as follows:

When a train is stopped by a block signal, it may proceed when the signal indicates proceed.

On **SINGLE TRACK.** Send a flagman in advance immediately, wait at least five minutes after the flagman has started, and then follow the flagman to the next distant or home block signal, in proceed position, or if the next distant or home block signal in advance is in plain view and in proceed position and track ahead is seen to be clear, proceed under control, not exceeding six miles per hour. Flagman need precede train only to a point where the track ahead is seen to be clear to the next distant or home block signal in proceed position, but train will not exceed six miles per hour to such block signal.

On **DOUBLE TRACK.** A train may proceed immediately, running under control not exceeding six miles per hour, to the next distant or home block signal in advance, except that a flagman must precede the train when view is obscured by weather conditions, tunnels, or other obstructions.

11-A. On **DOUBLE TRACK** when using cross-overs, trainmen must comply with Rule 99, on both tracks, and after switches are thrown wait five (5) minutes before moving through cross-over, unless automatic block signal in each direction can be seen to be in stop position, not less than one-half mile distant.

11-C. A train stopped at home signal on account of opposing train which can be seen taking siding, may immediately proceed at speed not exceeding six miles per hour, to fouling point, provided track is seen to be clear to the fouling point.

11-D. When a train which is to take siding is stopped by home signal at meeting point at which opposing train is standing on the main track, it may proceed immediately, under control, not exceeding six miles per hour, to the entering switch, provided track is seen to be clear to that switch.

11-E. When a train which is to take siding at meeting or passing point, or is to enter terminal yard, finds home signal other than interlocking signal in stop position on account of train to be met or passed standing on the main track, or on account of switch being lined up for receiving track, it may pass the home signal without stopping, when a trainman or switch tender is at the home signal giving proceed signals to indicate that switch is open, and may enter siding or receiving track at speed not exceeding six miles per hour, provided switch is seen to be open and track clear to fouling point of switch.

11-F. When the number plate of a home block signal is reversed, showing ''yellow,'' and signal indicates ''Stop,'' train may pass without stopping, but, unless otherwise directed by train order or bulletin, will proceed with caution, to the next signal.

11-G. When light is not burning in a distant or home block signal, speed must be reduced sufficiently to enable engineman to be governed by the position of the signal blade, and to observe the number of the signal, which will be reported as having light not burning from first train order office from which report can be made without delay to train.

11-H. Flagman preceding a train stopped by a block signal will watch carefully for broken rails or other defects of track, and when trains are authorized to proceed at six miles per hour without flagman in advance, both engineman and fireman will watch carefully for such defects.

12. Within block signal limits that portion of rules 86 and D-86 reading ''but must be clear at the time a first-class train in the same direction is due to leave the next station in the rear where time is shown'' is cancelled.

SPECIAL RULES GOVERNING MOVEMENT OF SOUTHERN PACIFIC TRAINS OVER EUREKA NEVADA RAILWAY AT PALISADE.

Derails in Eureka Nevada Railway track on each side of points where Southern Pacific Railroad crosses the Eureka Nevada Railway west of Palisade are connected with semi-automatic signals on Southern Pacific Railroad.

Westward trains approaching crossing on east side of Tunnel 1 will be governed by distant signal No. 5263 at east end of Palisade siding and home INTERLOCKING signal No. 5255 located just east of the east crossing. Eastward trains will be governed by distant signal No. 5248 and home INTERLOCKING signal No. 5252, both west of west crossing, and home INTERLOCKING signal No. 5254, west of east crossing. Trains stopped by these interlocking home signals will not proceed until it has been ascertained that derails on Eureka Nevada Railway are set to derail trains and may then proceed, being governed by Rule 504.

Trains will not exceed ten (10) miles per hour over any crossing of the Eureka Nevada Railway.

SPEED RESTRICTIONS.

13. Speed of passenger trains must not exceed 50 miles per hour at any point.

14. Speed of freight and mixed trains must not exceed 35 miles per hour at any point.

15. Maximum speed of Consolidated and Mikado engines running light 35 miles per hour, Mogul engines 40 miles per hour, passenger engines 50 miles per hour and yard engines 20 miles per hour. Consolidated, Mikado, Mogul and 2-10-2 type engines when used on passenger trains must not exceed speed of 40 miles per hour. Maximum speed of any locomotive running backward will be on main line 20 miles per hour, on branch lines 15 miles per hour.

16. All trains will reduce speed to 10 miles per hour when using cross-overs or turnouts and move under control through interlocking plants. Except that trains using crossover at Lucin and Rose Creek may run 20 miles per hour.

17. Trains entering sidings will do so under control. Responsibility for collision is placed with entering train.

18. When a train or a portion of a train takes siding it must pull into clear and not stop foul of the main track to allow the brakeman to get on after closing the switch.

21. Trains must run under control through tunnel three miles east of Mt. Montgomery and through tunnels 1 and 2 between Susanville and Bunnel.

23. Passenger and freight trains will observe speed as indicated on Slow Boards at different points.

24. Reduce speed to 15 miles per hour through Elko, Battle Mountain, Winnemucca, Lovelock and Wells.

25. Helper engines will not exceed 20 miles per hour Valley Pass to Montello or Moor to Wells.

27. Trains must reduce speed to 10 miles per hour between 21st and 28th Streets Ogden Yard.

28. When one torpedo is exploded train will come to a stop as per Rule 15. If no person is on hand to explain the placing of torpedo, train may proceed as hereinafter provided:

(a) If view is obscured in any manner, flagman must be sent ahead for a distance of at least one-half mile.

(b) If track is seen to be clear or within automatic block limits, if signal indicates "Proceed," train may proceed, not exceeding 6 miles per hour for a distance of one-half mile, before resuming full speed.

29. On double track lines, when a train finds a fusee burning red, train must be brought to a stop and may then proceed cautiously, not exceeding six (6) miles per hour, to the obstruction, or until clear signal is reached, or until track is known to be clear.

29-a. Yellow flags and lamps or slow boards will be placed one-fourth mile each side of structures or piece of track over which speed of trains must not exceed fifteen miles per hour, or rate of speed specified by bulletins, train orders or slow boards.

29-b. When a red flag or lamp is displayed and no person attending signal, train must be brought to a stop and be preceded by a flagman for a distance of at least one-half mile.

The following speed restrictions (unless otherwise specified) apply in both directions between the points named. The speed as indicated for freight trains also applies to mixed trains.

Between	Passenger Miles per Hour	Freight Miles per Hour
One mile West of Little Mountain and East Switch Promontory Point	30	20
West Switch Saline and East end Great Salt Lake Trestle	30	20
East end and West end Great Salt Lake Trestle	20	12
West end Great Salt Lake Trestle and Lakeside	30	20
West Switch Tioga and East Switch Cobre	40	20
Montello and West Switch Tioga	....	20
East Switch Cobre and Valley Pass	....	20
Tecoma and Lucin (on Eastward Track only)	40	20
West Switch Moor and Wells	40	20
Three Miles West of Tyrol and Palisade	35	25
Hazen and Mina	40	30
Churchill and Mound House	20	15
Fallon Branch	20	15
Mina and Tonopah Junction	40	30
Tonopah Junction and Queen	15	15
Queen and Hammil	25	25
Hammil and Chalfant	30	30
Chalfant and Bigelow	20	20
Bigelow and Keeler	30	30
Filben and Candelaria	15	15
Lucin and Kelton	20	20
Kelton and Corinne	25	25
Fernley and Susanville	40	30
Susanville and Westwood Junction	25	15
Westwood Junction and Westwood	35	20
All Tunnels (Main Line)	30	15

JUNCTION SWITCHES.

30. Switch at end of double track at Oreana will be set for westward track.

31. Switch at end of double track at Rose Creek will be set for eastward track.

32. Switches at end of double track, Lakeside and Engle, will be set for westward track.

33. Switches at end of double track, Montello and Lucin, will be set for eastward track.

34. Switch at Cecil Junction will be set for westward track.

35. Switch at Weber Junction will be set for eastward track.

36. Switch at Tonopah Junction will be set for narrow gauge track.

MISCELLANEOUS.

38. Marriott Spur from westward track no crossover.

39. Center trailing point siding at Rye Patch, Humboldt, Cosgrave, West Weber.

40. Trailing point cross-over (no siding) at Mill City.

41. When a helper engine is to be coupled into a train, copies of all orders affecting movement of the train at or beyond point from which helper is to be used, must be delivered to each helper engine crew before leaving the point at which coupled into train. If helper engine is picked up at a closed or non-telegraph office a copy of orders affecting movement of train at or beyond that station—and copy of clearance card—must be delivered to conductor of train at a preceding open telegraph office for delivery to the helper engineer before leaving station at which cut in. Train dispatchers will see that this is done.

42. **Additional Communicating Signals:**

(j) oooooo When running increase train heat.

(k) ——— When running look back for hand signal.

44. Passengers will not be carried on freight trains except persons in charge of live stock and employees holding passes endorsed, "Good on freight trains."

45. Enginemen will sound steam whistle, as provided in Rule 14 (L), approaching tunnels, **and where view is obstructed.**

47. Attention of all employes is directed to list of overhead structures on Page 10 and trainmen are notified that it is dangerous to stand on high cars in passing through them.

48. Telephones are placed in some non-telegraph stations and cabooses to enable trainmen to get orders. When a train arrives at one of these stations expecting to meet or be passed by another train, the conductor must, unless the train is there, immediately call up the telegraph office and ascertain if any further orders. If so, conductor will receive and repeat orders in the same manner as an operator, and as provided in Rules 201 to 256 inclusive. The lowest copy must be deposited in box provided in booth for that purpose.

49. Engines on freight trains of 20 cars or over must in all cases be cut off before taking water and fuel, except on grades.

50. That part of third paragraph of Rule 221-A of "Rules and Regulations of the Transportation Department" reading, "But trainmen will re-light the signal," is cancelled.

51 **YARDS ARE ESTABLISHED AT THE FOLLOWING STATIONS:**

(a) **Montello**—Extend to a point 2700 feet west of west switch to a point 1800 feet east of east switch.

(b) **Wells**—Extend to a point 2000 feet west of west switch to a point 1600 feet east of east switch.

(c) **Carlin**—Extend to a point 2700 feet west of west switch to a point 2100 feet east of east switch.

(d) **Imlay**—Extend to a point 3500 feet west of west switch to a point 1900 feet east of east switch.

(e) **Hazen**—Extend to a point 2800 feet west of west switch on main line to a point 3300 feet east of east switch on main line to a point 3300 feet east of Jct. Switch of the Fallon Branch on the N. & C. Branch.

(f) **Sparks**—Extend to a point 1½ miles west of Reno to a point 2700 feet east of east switch at Sparks.

(g) **Susanville**—Extend to a point 1300 feet west of west switch to a point 1100 feet east of east switch.

(h) **Westwood**—Extend to a point 13,700 feet west of west switch at Westwood or 7800 feet west of west switch at Conman.

(i) **Fallon**—Extend to a point 1300 feet west of west switch.

(j) **Moundhouse**—Extend to a point 2100 feet west of west switch.

(k) **Mina**—Extend to a point 14,400 feet west of west switch, Mina, to a point 16,600 feet east of east switch, Mina.

(l) **Laws**—Extend to a point 3300 feet west of west switch to a point 3300 feet east of east switch.

(m) **Keeler**—Extend to a point 8200 feet west of west switch, Keeler, or (800 feet west of Soda Works Spur).

(n) **Owenyo**—Extend to a point 1300 feet west of west switch to a point 1300 feet east of east switch.

(o) **Wabuska**—Extend to a point 1300 feet west of west switch to a point 1300 feet east of east switch.

52. First paragraph of Rule 92 will not apply to westward trains arriving Sparks and eastward and westward trains arriving Carlin.

53. Rules 93 and D-93 are revised as follows:

Within yard limits the main track may be used, protecting against first-class trains. **ALL TRAINS MUST APPROACH YARD LIMITS AND PASS THROUGH YARDS UNDER CONTROL.**

More than 50 M's	0	0	0	0	0	0

MAXIMUM SPEED FOR WHICH LOCOMOTIVES ARE COUNTERBALANCED.

All Locomotives, with the following exceptions are Counterbalanced for a speed in miles per hour equal to the number of inches in diameter of driving wheels.

Class of Locomotive	Engine Numbers	Maximum Speed in Miles per Hour	Maximum Wheel Pressure
P-8	2461 to 2475	55	....
A-1	3000 to 3009	63	45120 lbs.
MC-1	4000 and 4001	53	42760
MC-2	4002 to 4016	53	42760 "
MC-4	4017 to 4028	53	43130 "
MC-6	4029 to 4043	53	43230 "
MC-6	4044 to 4048	53	42680 "
MK-2	3200 to 3202, 3205, 3206, 3210, 3211	49	46140 "
MK-4	3216 to 3230, 3232 to 3235	49	45560 "
MM-2	4200 to 4211	56	46300 "
T-6	2187, 2190, 2194, 2200, 2203, 2204, 2205	50	22740 "
T-6	2197, 2208	45	24110 "
T-28	2311 to 2314, 2316, 2317, 2320, 2323, 2325, 2327, 2328, 2330, 2342, 2343, 2352	54	46220 "
TW-2	2946, 2948 to 2953	43	25860 "
TW-4	2926 to 2931	44	26000 "

Note.—Maximum speed in miles per hour is based on vertical disturbing force of Counterbalance not exceeding 75% of static wheel load, and maximum wheel pressures shown obtain at speeds indicated.

The above table is for the information of engineers, and must not be construed in any way to authorize exceeding speed limits specified in speed restriction table.
